**Subject:** IARC Monograph vol 112- EFSA Review of Glyphosate ■

Dear IARC V 112 Working Group Members,

I want to thank those of you who have gotten back to me with suggestions and a decision on whether to sign onto this letter. After much discussion with several colleagues, it seems best to me that rather than developing a letter from the WG, we develop a letter from many different scientists expressing concern about the differences between the BfR Addendum and the IARC WG report and questioning the scientific quality of the BfR Addendum. Thus, I have rewritten the document with many of your suggestions and with a tone that now reflects a letter from a group of concerned scientists. I will be sending this out shortly to a large list of folks, you included, to see if I can get sufficient buy-in to publish the letter. Thank you for your help up to this point.

C.
